

# Steering gears

As an integral part of a vessel's maneuverability, it is essential that the steering system on board be of reliable quality.

With more than 50 years of experience in this field, Hydromar is an ideal partner for the development of steering equipment for your vessel.

Our personnel fully comprehend the issues involved in yachting; the combination of a sleek appearance with reliable engineering, where alternative equipment may be unsuitable.

Hydromar steering equipment has been installed in numerous vessels, motor and sailing yachts by many well-known yards.

All steering equipment is designed to Lloyds Rules but can be delivered compliant with any classification society.

Over 35 years a series of steering models has been developed intended for vessels of 12-60 m.

The Hydromar range of steering equipment comprises the following versions:

- Single cylinder for single rudder HFS-1\*
- Two cylinders for single rudder HFS-2\*
- Single cylinder for twin rudder HFT-1\*
- Two cylinders for twin rudder HFT-2\*

With decades of experience in hydraulics, combined with state of the art production facilities, Hydromar can offer steering equipment as a complete package. Reliability rests not only with the steering gear itself, but also the hydraulic systems that drive it.

Within our modern premises, we engineer, produce and test these steering systems ensuring flexibility in design in combination with the highest quality.

Whether your requirement is for a simple manual hydraulic steering wheel or a sophisticated power assisted steering system with autopilot, a HYDROMAR solution is at hand.
